|--------------|--|
| +3.00 | Remove your glasses. Standing |
| +2.50 | 14 inches away, read this sample type. |
| +2.00 | Continue until you reach the first one that is not |
| +1.75 | clear. The focus power shown to the left of the line is the |
| +1.50 | one you need. Verify your selection by reading this test through the |
| +1.25 | <small>OPTX 20/20 Magnifying Lenses in the corresponding power. All type should be in focus.</small> |

**Print This in Hi-Res
Actual Size, then
proceed as instructed
below.**

Prescription Eyeglass Wearers - KEEP YOUR GLASSES ON... we're testing your normal eyesight.

Sunglass Wearers, Safety Glasses, etc. - Take your glasses off... we're testing your normal eyesight.

Hold the Chart 14 inches away from your eyes and read down as the type gets smaller. The first line that gets unclear is the one at the power you need to order your stick ons.
